EB10X NEW GRADE FOR CV-JOINT

EHWA DIAMOND

EHWA DIAMOND TOOLS

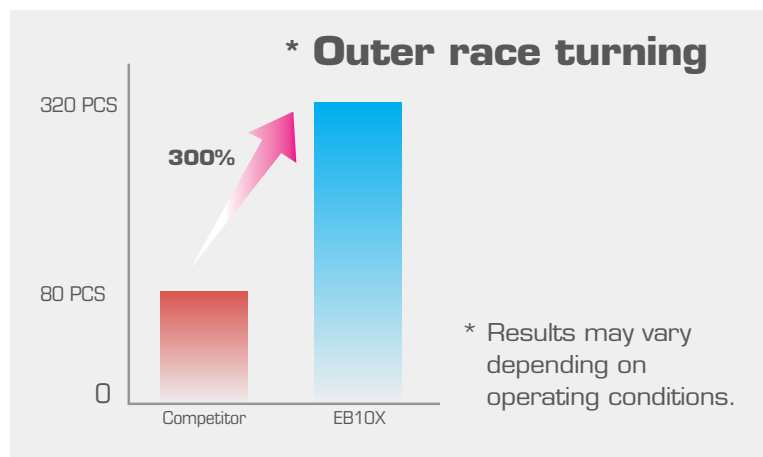

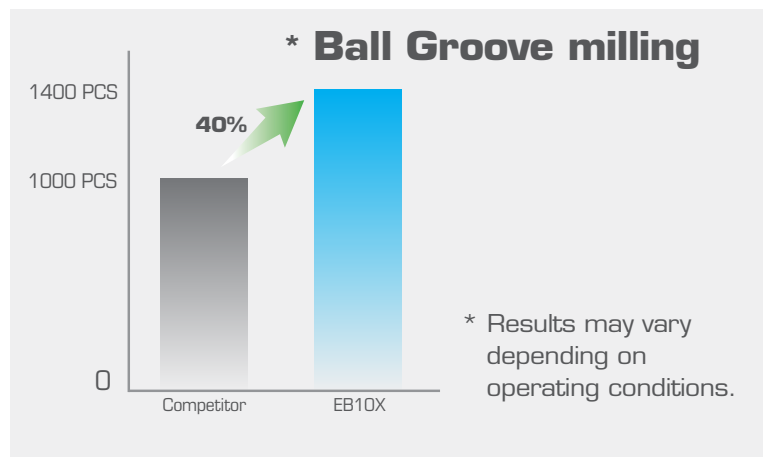

EB10X NEW GRADE FOR CV-JOINT

EB10X is newly developed for harsh hard-turning applications. It contains a high percentage of CBN with micro-sized grits, providing excellent toughness and resistance against thermal impact.

This grade significantly improves wear resistance and minimizes thermal deformation, resulting in better surface finish and longer tool life.

Grade	Grit Size	CBN volume
EB10X	1 μ m	90 %
